ABSTRACT

This project is on a Computer Graphics by using OpenGL. This Project is a 2D animation on 'LIFE OF FISH IN FISH TANK'. This project gives a graphical picture of fishes that are present in fish tank. This Project demonstrates a simple illustration of how fish tank looks like and the movements of fish, with option of providing foods, assembling the fishes as well as the poison food to decrease the population of fish inside and many more actions related to an Aqua World. This is a simple attractive OpenGL project to attract kids. This project will be done in C language using OpenGL. Various built in commands and functions will be used to draw figures.
